- **Sensitization:**

No sensitizing effects known.

Low in Chromate (< 2 ppm) acc. Regulation (EC) No 1907/2006 (REACH).

- **Subacute to chronic toxicity:**

The amount of respirable crystalline silica is less than 0.1 %.

Respirable crystalline silica (quartz) may cause a severe lung disease named silicosis. Symptoms of silicosis may be a shortness of breath, fever or cough. Silicosis is reported to increase the risk of carcinogenicity caused by continuous inhalation of respirable crystalline silica. Though the product itself contains less than 0.1% of respirable crystalline silica, respirable silica may be generated from working procedures such as grinding e.g. In general, inhalation of silica dust should be avoided. Therefore, for your own safety wear a suitable NIOSH-approved respirator in all occasions when handling of the product generates dust.
